Huffman Offers Remanufactured Machinery

Are you looking for a way to increase productivity while reducing capital expenditures during these difficult economic times? Consider investing in a remanufactured, current-technology Huffman multi-axis machine for about 50 percent less than a comparable new machine!

Huffman Remanufactured Machines are in New Machine Condition!

Every dynamic wear component is replaced restoring the machine to original factory specifications. Some components are upgraded with current technology components.

- Warranty same as new machine
- Complete disassembly and cleaning of the machine
- New ballscrews and rail sets installed to straightness and squareness specifications
- Disassembly and rebuild of rotary axes using new bearing, gears, and seals
- Replacing or repairing feedback devices as required
- Replacing lubrication, hydraulic, coolant, and pneumatic lines
- Installing and balancing new spindle and spindle motor
- Replacing belts and waycovers
- Replacing and tuning servo motors and drives
- Rewiring the machine axes
- New Lights
- New limit, home, and door switches, and sensors
- New door rails and bearings
- Painting the machine (optional)
- Performing positioning accuracy and repeatability inspections using a laser interferometer
- New control (optional)
