KeenFlo

Laminar Flow Coolant Conditioning Manifold

Huffman Corporation offers to owners of HS-150 and HS-200 series grinders a new laminar flow coolant delivery device, KEENFLO.

KEENFLO is aimed at increasing throughput through better coolant delivery.

BENEFITS:

Increases Material Removal Rates 5-10%*

- ✓ Propels more coolant and less air into the grind zone
- ✓ Provides near zero turbulence at the manifold exit
- ✓ Improved heat removal

* Material removal rate increases are based on test results at Huffman Corporation

Less Cumbersome Setups

- ✓ Allows nozzle to part standoff up to 12 inches while maintaining laminar flow

Extends Pump Life and Lowers Pump Damage Risk

- ✓ Creates constant back pressure to the coolant delivery system

Increases Coolant Flow for Filter Systems with Restrictor Plates

- ✓ Allows removal of coolant delivery restrictor plates
- ✓ Extends pump life

Easy Retrofit to 150 and 200 Huffman Grinding Series

- ✓ Fits in identical envelope of original Huffman manifolds
- ✓ Uses existing entrance and exit end hardware and hoses

Available in two models

- ✓ 6 inlet ports, each with one nozzle (6 total nozzles)
- ✓ 6 inlet ports, each with two nozzles (12 total nozzles)
- ✓ Each inlet port is an individual M-code programmable coolant zone
